

***Special Projects** not on the Core Aircraft List may still be possible under a Class 1, 3 or 4 rating if a QF100 eval shows we have training, facilities, tooling and tech data.

International Projects - Please review the Op Specs for each country. ***Class 1&3 aircraft that weigh 12,500 lbs MGTOW or less** per the TCDS do not require a QF100 for minor maintenance and preventive maintenance. For inspections and larger work scopes in Class 1&3 (removal, disassembly and installation of powerplants, propellers, primary flight controls & landing gear) a QF100 is required. Aircraft managed by Duncan Flight Operations do not need a QF100. **Instrument and Radio Maintenance** – For maintenance performed under Instrument and Radio Class ratings (ie: 14 CFR Part 43, Appendices E and F) the aircraft is not required to be on this list and a completed QF100 is not required.
